

fMRI Experimental Design

Tools

- Chris Rorden **fMRI Simulator**: <http://www.mccauslandcenter.sc.edu/CRNL/tools/fmrism>
- **optseq2** is a tool for automatically scheduling events for rapid-presentation event-related (RPER) fMRI experiments (the schedule is the order and timing of events):
<http://surfer.nmr.mgh.harvard.edu/optseq/>

Good explanation about optseq and event-related designs:

<http://andysbrainblog.blogspot.de/2012/09/optseq-and-event-related-designs.html>

- **RSFgen** is a AFNI tool for paradigm design:
http://afni.nimh.nih.gov/pub/dist/doc/program_help/RSFgen.html
- **make_random_timing.py** is a AFNI tool to define multiple events, their responses and their time series: http://afni.nimh.nih.gov/pub/dist/doc/program_help/make_random_timing.py.html
- **3dDeconvolve** is a AFNI tool to evaluate the power of each experimental design:
http://afni.nimh.nih.gov/pub/dist/doc/program_help/3dDeconvolve.html

Theory

K. J. Friston, E. Zarahn, O. Josephs, R. N. A. Henson, A. M. Dale (1999) Stochastic Designs in Event-Related fMRI, *NeuroImage*, 10: 607-619. PMID: 10547338
