

# MATLAB FieldTrip

[http://www.fieldtriptoolbox.org/faq/should\\_i\\_add\\_fieldtrip\\_with\\_all\\_subdirectories\\_to\\_my\\_matlab\\_path/](http://www.fieldtriptoolbox.org/faq/should_i_add_fieldtrip_with_all_subdirectories_to_my_matlab_path/)

The issue with functions from /external replacing original MATLAB functions:

[http://www.fieldtriptoolbox.org/faq/can\\_i\\_prevent\\_external\\_toolboxes\\_from\\_being\\_added\\_to\\_my\\_matlab\\_path/](http://www.fieldtriptoolbox.org/faq/can_i_prevent_external_toolboxes_from_being_added_to_my_matlab_path/)

Use the following in your custom startup.m

```
addpath('Y:\Sources\fieldtrip-20190130'); % or other path to fieldtrip ft_defaults
```

```
[ftver, ftpath] = ft_version; rmpath(fullfile(ftpath, 'external', 'signal')) rmpath(fullfile(ftpath, 'external', 'stats')) rmpath(fullfile(ftpath, 'external', 'images'))
```

or execute [https://github.com/dagdpz/test\\_FT/blob/master/test\\_FT\\_initialize.m](https://github.com/dagdpz/test_FT/blob/master/test_FT_initialize.m) on clean MATLAB path (i.e. without added FieldTrip)
