

Monkeypsych installation

ViewPoint eyetracking

1. Install ViewPoint
2. Make sure the paths in
`\Interfaces\Windows\MATLAB\ViewPoint_EyeTracker_Toolbox\vp_x_initialize.m` are correct
3. In case of fresh MATLAB installation, `vp_x_initialize` will give an error related to `VPX_InterApp.dll` and compiler. In this case, follow on-screen suggestions and run “`mex -setup`”. If no compiler was suggested by MATLAB, install one of freely available compilers (see e.g. <http://www.mathworks.com/support/compilers/R2011b/win64.html>).
