Important: attachmentRenameFormatString → **{%c - }{%y - }{%t{160}}**

File Copies and Links

Files can be added to your Zotero library as either copies or links. With copies, a copy of the original file is stored in the Zotero data directory. File copies are synced if file syncing has been set up. In contrast, when a file is linked, Zotero only stores a link to the location of the original file. Linked files are not synced.
